

Armada Kalamunda Group

Goals of Patient Care eForm Procedure

Site	Operational Area	Applicable to
Armada Kalamunda Group	All services	Medical, Nursing, Allied Health, Administrative

1. Purpose

This procedure has been developed to provide clinicians with direction for completing the Goals of Patient Care (GoPC) eForm documentation and undertake associated workflows during the implementation of the GoPC eForm. Administrative staff are required to have knowledge of the processes associated with the completion of the GoPC eForm. This procedure should be read and applied in conjunction with the [AKG Goals of Patient Care Policy](#).

2. Overview

GoPC is a clinical framework which prompts and facilitates proactive shared decision making between clinicians and patients and/or persons responsible (i.e. family, carer) to ensure treatment provided is aligned to the patient's preferences, needs, values and wishes. It establishes and documents the agreed GoPC that will apply in the event of the patient's clinical presentation and/or deterioration.

Treatment goals should be clarified or revisited on every presentation, inclusive of where extended use of a prior GoPC form has been endorsed.

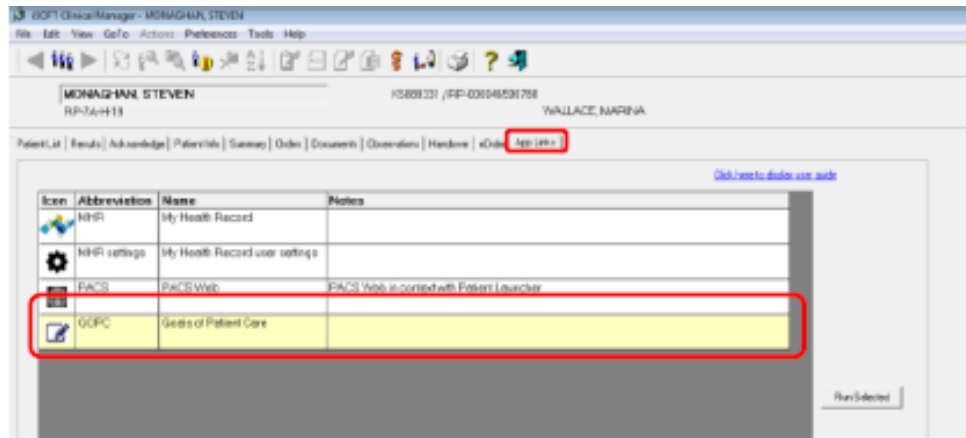

If the patient does not have capacity to determine their goals of care then refer to the [Public Advocate WA's Treatment Hierarchy of Treatment Decision-Makers](#).

3. Inclusion criteria

All inpatients of AKG wards who meet the criteria for GoPC discussions as a matter of priority in accordance with the [AKG Goals of Patient Care Policy](#).

4. GoPC eForm procedure

1. Launch the application from iSOFT through the 'App Links' tab

2. Select 'New Document' if there are no previous eForms created or 'Edit' if there is a previous version to be superseded

WOOD, ALLEN		Date Of Birth: 13-Dec-1945 (75y) Gender: Male	J2190801
Kalamunda Hospital		Admitted At: 08-Apr-2021 10:10 AM Discharged At: Location: ANDT, R08, BA	KM@46650608 Inpatient

For Extended Use	Published At: 08-Jul-2021 08:27 AM Published By: he790002	Goal of Care Level: Life Extending Intensive Treatment Version: 1	Void View

3. Section 1 of the GoPC eForm can be completed by any Junior Medical Officer (JMO).
4. Sections 2, 3 and 4 of the eForm must be facilitated by a Senior Medical Officer (MO) (i.e. Registrar or Consultant) and should be completed and published at the earliest available opportunity within 48 hours of admission.
5. A JMO may complete all sections of the eForm however this must be done under the guidance and instruction of a Senior MO following or during their discussions with the patient and/or family, carer(s).
6. The Senior MO's details must be captured on the eForm as a record that they were involved in the discussion. The completed eForm must be published by a Senior MO.
7. The Consultant field is auto filled from WebPAS (patient administration system) however must be reviewed to ensure it reflects the appropriate Consultants' team undertaking the GoPC discussion. Where this differs from what is auto filled, you can overwrite the

Consultant and Specialty fields. If this is the case, the ward clerk must be notified of the responsible Consultant's name so they can update this information in WebPAS.

8. During the GoPC discussion, permission should be sought from the patient to upload a copy of the eForm to My Health Record (MHR). If permission is received to upload to MHR, the corresponding field in the eForm needs to be checked, a notation included in the discharge summary and next of kin informed where permitted by the patient.
9. The completed GoPC information is to be confirmed with the patient or named person and then ticked as completed in the eForm.
10. Once published, a PDF of the GoPC should automatically appear in a pop-up window allowing it to be printed. If pop-ups are blocked, you can print the eForm by reopening the completed eForm and electing the 'print' button. It will also be accessible via the iSOFT document list.
11. The published GoPC form is to be printed immediately by the treating Senior MO and placed in the dedicated GoPC plastic sleeve located in the patient's bedside file.

Note: an empty GoPC sleeve should prompt staff to check whether a GoPC discussion and eForm is required and/or an unverified eForm exists in the application.

4.1 GoPC eForm validity period

- The GoPC eForm is valid for the patient's current admission.
- A Consultant can endorse the GoPC form for extended use (Section 4) within the same health service (i.e. Armadale and Kalamunda) beyond the current admission for any period from 24 hours up to 12 months, if during discussions with the patient it is identified their GoPC information will remain relevant. For example, extended validity may be used to cover an ambulance journey on discharge home.

4.2 GoPC downtime process

- Should iSOFT or the GoPC application become unavailable at any time, hard copy GoPC forms will need to be completed.
- A limited number of hard copy GoPC forms are accessible from the hospital nurse managers office and should **ONLY** be used if the eForm is not available via iSOFT at the time of completion.
- If a hard copy GoPC form is completed due to downtime, this does not necessitate an eForm also being completed.
- Follow the same procedure as above to confirm the GoPC form content with the patient and place the hard copy in their bedside file.

4.3 GoPC amendment process

- During a patient's admission, if it is identified during discussions that their treatment goals change, a new GoPC eForm is required to be completed.
- **Note:** printed GoPC eForms are **NOT** to be handwritten on with amended goals.
- The revised eForm must be amended, published, printed and filed in front of the superseded form(s) in the dedicated plastic sleeve in the patient's bedside file.
- The Senior MO is to place a line through the old printed GoPC form and include their name, signature, date and time to acknowledge the form is no longer current.

4.4 Variations

- The Senior MO is responsible for documenting the reasons for the change to the patient's treatment goals in their medical record.

4.5 Voiding eForms

In the event an eForm is created in error it can be voided even after it is published:

- If the GoPC eForm was created incorrectly during the current admission, any of the medical staff can VOID an eForm within the GoPC application, by selecting the VOID button.
- If a staff member notices that a GoPC eForm has been incorrectly created (e.g. wrong patient) during a prior admission or episode of care they should contact the author of the eForm or the admitting Consultant and confirm the eForm version that needs to be deleted.

Once it is confirmed a void needs to occur, contact the Manager Health Information Management Service requesting void of the particular GoPC eForm. Email AHS.HIMSManager@health.wa.gov.au the details of the patient, the specific eForm that needs to be voided, the reason for the void and evidence of confirmation received from the author or admitting Consultant.

5. Discharge and transfer

- If a patient is admitted or transferred to Armadale or Kalamunda with a valid GoPC form completed at another site, medical staff are responsible for clarifying the treatment goals with the patient and completing a new GoPC eForm.
- Medical staff are to include GoPC discussions in the patient's discharge summary.

6. Legislative context

The following documents are required to give effect to this policy:

- Health Department of WA (HDWA) [Recognising and Responding to Acute Deterioration Policy](#)
- HDWA [Health Clinical Handover Policy](#)
- HDWA [Health Consent for Treatment Policy](#)
- East Metropolitan Health Service [Voluntary Assisted Dying Management Policy](#)
- EMHS [Voluntary Assisted Dying Management Procedure](#)

7. Supporting information

The following documents support the implementation of this policy:

- [Goals of Patient Care Policy](#)
- [End of Life Care Procedure](#)
- [Recognition and Response Acute Deterioration Policy](#)
- [Advance Health Directive and Enduring Power of Guardianship Guideline](#)

8. Compliance, monitoring and evaluation

Compliance against this guideline will be monitored under the governance of the Deputy Director Clinical Services. The following Key Performance Indicators (KPIs) will be used to evaluate the success of the project implementation:

- Percentage of discharged patients who meet criteria for a GoPC with completed eForms.
- **Note:** inclusion criteria is based on criteria outlined under 'Priority Setting' section of [AKG Goals of Patient Care Policy](#).
- Spot audits of percentage of current GoPC eForms printed and presented at patient's bedside within 48 hours of admission or transfer.
- Staff awareness of the GoPC eForm and how to complete appropriately.

9. Relevant standards

National Safety and Quality Health Service (NSQHS) Standards (second edition):

- Standard 2 – Partnering with Consumers
- Standard 5 – Comprehensive Care
- Standard 6 – Communicating for Safety
- Standard 8 – recognising and Responding to Acute Deterioration

10. Document owner

Director Clinical Services
