

Blood Management Policy

1. Applicability

Site	Operational Area	Applicable to
Armadale Kalamunda Group	All areas	Medical Nursing Patient Support Services

2. Purpose

This policy outlines the patient blood management (PBM) program across the Armadale Kalamunda Group and is supported by the Patient Blood Management Manual.

3. Scope

This policy applies to all staff involved in prescribing, ordering, processing, administering or handling blood and blood products inclusive of red blood cells, albumin, platelets, fresh frozen plasma, cryoprecipitate, fractionated plasma products such as immunoglobulin and clotting factors.

4. Mandatory Requirements

- Informed Consent must be obtained as per [Consent to Treatment Policy Department of Health](#)
- Patient Identification must be completed as per the [Patient Identification and Procedure Matching Policy East Metropolitan Health Service](#)
- Staff must consider using interpreters and other communication strategies, as necessary, and this must be documented on the consent form. [Armadale Kalamunda Group Interpreter and Translator Guideline](#)
- Haemovigilance Reporting of transfusion related adverse events to fresh blood Haemovigilance Reporting Flowchart (see [Blood Management Manual](#))
- [ROTEM \(Blood Manual\)](#)
- Administration of red blood cells, fresh frozen plasma, platelets must commence within 30 minutes of leaving an approved blood fridge from Pathwest and concluded within 4 hours.
- Compatible fluid: Sodium Chloride 0.9% only to be used for priming and flushing lines
- Refusal of Blood or Blood Products must be completed on the Release of Liability Form AKMR176.18

Alert: For access to advice for clinicians treating Jehovah's Witnesses a local representative of the Hospital Liaison Committee Network can be contacted 24 hours a day on 0418 931 193

5. Compliance monitoring

Compliance against this policy will be monitored by the AKG Blood Management Committee.

Compliance monitoring activities relevant to this policy include:

- NBA Fresh Blood Product Management Reports
- Health Roundtable National Standards Report -Blood Management
- Blood transfusions in elective hip and knee replacements- Health Round Table Report
- East Metropolitan Health Service (EMHS) Safety & Quality Report – Blood Management
- DoH Executive Summary RBC Discards - Pathwest Armadale (6 monthly)
- Digital Data Innovation Patient Blood Management (PBM) Dashboard (6 monthly) monitoring of:
 - percentage of single red blood cells administered as a single unit
 - percentage of red blood cell transfusions administered with a haemoglobin value over 80g/L
 - percentage of elective surgery patients admitted anaemic
- AKG Combined Bedside Risk Audit (CoBRA) Blood Management monthly monitoring
 - Blood product consent valid and completed
 - Product labels identifiable on the prescription form
 - Valid prescription for blood product present
 - Observations - baseline recorded
 - Observations – 15/60 recorded
 - Observations – 1/24 recorded
 - Observations – on completion of transfusion

Clinical Incidents related to Blood Management – monthly monitoring of all reported clinical incidents and severity access codes related to blood across AKG

- WA Haemovigilance Report – provides data and information on transfusion and donation related adverse events (6 monthly)
- AKG Medical and Nursing monitoring of compliance to eLearning module “Clinical Transfusion Practice” (quarterly)
- AKG Patient Care Assistants/Orderlies/ Porters monitoring of compliance to eLearning module Transporting Blood (quarterly)

6. Legislative context

The following documents are required to give effect to this policy:

- *Guardianship and Administration Act 1990 (WA)*
- *Human Tissue and Transplant Act 1982 (WA)*

7. Supporting information

The following documents support the implementation of this policy:

- [ANZSBT Guidelines](#)

- [National Blood Authority Guidelines](#)
- [CSL Product Information](#)
- [Blood Management Manual](#)
- [Australian Red Cross Lifeblood](#)
- [Perth Children's Hospital Transfusion Medicine Protocols](#)
- [Women and Newborn Health Service Transfusion Protocols \(Neonates\)](#)
- [Advance Health Directive and Enduring Power of Guardianship Guideline](#)

8. Relevant standards

National Safety and Quality Health Service (NSQHS) Standards (second edition):

- Standard 7 – Blood Management Standard

10. Glossary

The following definitions are relevant to this policy.

Term	Definition
Haemovigilance	a set of surveillance procedures covering the entire blood transfusion chain, from the donation and processing of blood and its components to their provision and transfusion to patients, to their follow-up. It includes monitoring, reporting, investigating and analysing adverse events related to the donation, processing and transfusion of blood, as well as development and implementation of recommendations to prevent the occurrence or recurrence of adverse events.
Blood Product	is any therapeutic substance derived from human blood, including whole blood and other blood components for transfusion, and plasma-derived medicinal products.
Fresh Blood Products	are products that can be manufactured by simple separation of blood into its components via centrifugation. They include red blood cells, platelets and plasma products such as fresh frozen plasma, cryoprecipitate and cryodepleted plasma
Plasma Derivatives	products that are manufactured from blood plasma through a process called fractionation, in which different types of proteins found in blood plasma are separated, purified and concentrated into therapeutic doses. They include but not limited to Albumin, Fibrinogen, Factor VIII, Factor XI, Prothrombinex, Immunoglobulin e.g. anti -RH(D) tetanus, Hepatitis B, Intragram

11. Policy contact

Enquiries relating to this policy may be directed to:

Title: Director of Clinical Services
Department: Executive Team
Email: Alison.Parr2@health.wa.gov.au

12. Review

This policy will be reviewed and evaluated as required to ensure relevance and currency. At a minimum it will be reviewed within one (1) year after first issue and at least every three (3) years thereafter.

Version	Effective from	Effective to	Amendment(s)
V2	18/10/2023	18/10/2026	Scheduled review
