

Clinical Practice Guideline

Charting of Nutritional Supplements

Scope

Site	Service/Department/Unit	Disciplines
SCGOPHCG	Organisation wide	Allied Health, Nursing, Pharmacy

Introduction

Nutritional supplements include a variety of products which are used to address nutritional issues in the clinical setting. These may be suitable for oral intake, enteral feeding or both. The most common nutritional products are oral nutritional supplements which are multi-nutrient liquid, semi-solid or powder products that provide macronutrients and micronutrients with the aim of increasing nutritional intake. Other products addressing nutritional issues which may be indicated in the clinical setting include oils such as Medium Chain Triglycerides. This procedure has been developed to authorise charting of nutritional supplements by Dietitians on the Western Australian Hospital Medication Chart (WA HMC).

Definitions

WA HMC	Western Australian Hospital Medication Chart
Oral Nutrition Supplement	Oral Nutrition supplements are multi nutrient liquid, semi-solid or powder products that provide macronutrients and micronutrients with the aim of increasing nutritional intake

Key Principles

1.0 Charting of a Nutritional Supplement

1.1 Indications for Ordering of Nutritional Supplements

- Malnutrition
- Inadequate nutritional intake as assessed by the Dietitian
- Disease specific indicators for medical nutrition therapy (e.g., critically ill, cancer)
- Increased/specialised nutritional requirements (e.g., dialysis, surgical)
- Impaired ability to absorb nutrients (e.g., inflammatory bowel disease, intestinal failure)
- Impaired ability to ingest nutrients (e.g., oesophageal tumours, neurological disorders)
- Patients with swallowing disorders identified by Speech pathology who require nutrition support.

1.2 Responsibilities

- The Dietitian is responsible for:
 - the ordering of ONS prescription on the WA HMC
 - checking the WA HMC for transcribing errors of nutritional supplement orders at every review (e.g., when charts are re-written)

- ### 1.3 Charting of Nutritional Supplements on the WA HMC
- All orders must be written legibly in black ink
 - A separate order is required for each nutritional supplement

[illegible]

- | | | | | | |
|-------------------|-------|--------------|------|------|------|
| Daily | Daily | 1000 | | | |
| Morning | Mane | 0800 | | | |
| Night | Nocte | 1800 or 2200 | | | |
| Twice daily | BD | 1000 | 1400 | | |
| Three times daily | TDS | 1000 | 1400 | 2000 | |
| Four times daily | QID | 0600 | 1200 | 1800 | 2200 |

- Printed or personally saved electronic copies of this policy are considered uncontrolled. Refer to the SCGOPHCG Policy Hub for current controlled electronic policies

To order a nutritional supplement PRN the Dietitian must have the following complete:

- Start date of the order
- Generic medicine name
- Route of administration
- Dose and hourly frequency (PRN alone **is not** sufficient)
- Indication and maximum daily dose (e.g. Maximum dose in 24hrs)
- Dietitian's signature, printed name and contact details

[illegible]

To cease the nutritional supplement order:

- ### Figure 3: Ceasing Nutritional Supplements

Always use the term "CEASED". No other term is acceptable.

Example:

Start Date 19/11	Medicine (print generic name)/form RESOURCE PROTEIN	☒ Tick slow release
Route PO	Dose and Frequency 200 mL TDS	Now enter times →
Indication Nutritional supplement	Pharmacy From Dietetics	Imprest S8 S4R
Prescriber signature 	Print name Jane Smith	SAC/AAN

1000	a	←	a	CEASED 22/11/18 - no longer required 
1500	a	→	a	
2000	a	→	+	

Continue on discharge? ☐ Y / ☐ N
 Dispense? ☐ Y / ☐ N
 Duration: days Qty:
 Prescriber's signature:
 Date:

4.0 After Hours

In the after-hours setting, medical staff can chart nutritional supplements based on clinical judgment in relation to need for initiation or continuation. Please note Sustagen® is not available at ward level at SCGH, however it is available at ward level at OPH . Please check product details for any known allergens prior to charting.

Compliance, monitoring and evaluation

Prior to authority to write on the WA HMC Dietitians will be required to complete the National Standard Medication Chart course online. This will be completed with every new release of the education package and will be recorded in the Nutrition and Dietetics department mandatory training log. Compliance with this guideline will be audited yearly by the Nutrition and Dietetics department. In addition, compliance with this procedure (competency) will be assessed as part of the credentialing process for all clinical staff in the Dietetics and Nutrition department.
