Permethrin 5% Cream

Route:	Topical	Brand:	Lyclear® or current brand in stock
Form:	Cream	Strength:	5% w/w
Dose:	Apply up to one 30g tube. Repeat after 7 days.	Quantity:	2 x 30g or 1 x 60g
Instructions:	Apply cream to clean, cool, dry skin from the chin down and wash off with warm, soapy water 8 to 14 hours later. Rinse thoroughly. Repeat after 7 days. In elderly and immunocompromised people apply to the scalp, neck, face and ears (because scabies above the neck is common in these groups).		
Administration Notes:	Avoid cream in contact with eyes, mouth and inside the nose. Remember to apply cream between fingers, toes, under nails, in skin folds, to belly button, between the buttocks and to groin area. Bed linen, towels and clothing that has been in contact with the person in the previous 48–72 hours should either be washed and dried on hot machine settings, dry-cleaned, ironed or stored in tightly sealed plastic bags for at least 8 days.		
Patient Inclusion:	Staff contacts as per the SCGOPHCG Infection Prevention Control; Scabies, Lice, Fleas and Bedbugs Guideline		
Patient Exclusion:	Known hypersensitivity to any component including permethrin, other synthetic pyrethroids or pyrethrins		
Safety in Pregnancy / Breastfeeding:	Pregnancy: safe to use Breastfeeding: Safe to use. When treating scabies, wash from nipples before breastfeeding and reapply afterwards.		
Documentation:	Entry of supply into WHS Staff Health Database.		
Adverse Effects:	Skin discomfort (burning and stinging), itch (may persist for up to four weeks post treatment), rash, erythema, oedema.		
Clinical Guidelines	SCGOPHCG Infection Prevention Control; Scabies, Lice, Fleas and Bedbugs Guideline
