Place Card

PROMETHAZINE

Scope

Site	Service/Department/Unit	Disciplines
Fiona Stanley Hospital Fremantle Hospital	Hospital Wide	Medical, Nursing and Pharmacy

This has been classified as a low risk intravenous drug guideline and may be accessed using up to date information from the online Australian Injectable Drug Handbook (AIDH) from the link below:

[Promethazine in the AIDH](#)

If the information contained in the AIDH does not meet clinical requirements, please contact your clinical pharmacist.

Specialty area links

Obstetrics & Gynaecology guideline – see [KEMH obstetrics and gynaecology medication guidelines](#)

Policy Information ONLY

1. FSFHG specific information

- In the event of a FSFHG specific intravenous drug guideline or specialised drug guideline not being available, staff are advised to refer to the Australian Injectable Drug Handbook (AIDH) for administration information in Section 2.

2. Low Risk Intravenous Drug Guidelines card link

- [Australian Injectable Drug Handbook \(AIDH\)](#)
- The AIDH can also be accessed from the [library website](#) on or offsite.

3. Responsibilities

- Information contained in this low risk intravenous drug guidelines place card describes the minimum requirements for FSFHG and must be applied within

FSFHG context, scope of practice, level of service delivery and facility capacity.

- Variations that take into account individual circumstances, available equipment, clinical judgement, scope of professional practice and patient choice may be appropriate.
- If the content in the hyperlinked policy does not meet clinical requirements or is unable to be applied to the FSFHG environment notify your clinical pharmacist and line manager.

4. Place card functionality

- If the hyperlink in this document is not functioning please notify the FSH Guardrails pharmacist as soon as possible:
FSH.PharmacyGuardrails@health.wa.gov.au

5. Authorisation
