

PROCEDURE

Models of Care – Development and Governance

Scope (Staff):	All staff
Scope (Area):	ICAMHS-wide

Child Safe Organisation Statement of Commitment

CAHS commits to being a child safe organisation by applying the National Principles for Child Safe Organisations. This is a commitment to a strong culture supported by robust policies and procedures to reduce the likelihood of harm to children and young people.

This document should be read in conjunction with this [disclaimer](#)

Aim

This procedure outlines the development and governance of Models of Care within ICAMHS.

Risk

Non-compliance with this procedure may result in Models of Care and subsequently service delivery that is not; current, evidence based, or responsive to the needs of consumers, staff and the organisation.

Definitions

Model of Care: A “Model of Care” broadly defines the way health services are delivered. It outlines best practice care and services for a person, population group or patient cohort as they progress through the stages of a condition, injury or event. It aims to ensure people get the right care, at the right time, by the right team and in the right place.

Key points

- Models of Care are not classified as ‘policy documents’ under the [Child and Adolescent Health Service \(CAHS\) Policy Management Policy](#).
- Although the development and governance of Models of Care within ICAMHS is overseen by the ICAMHS Policy team, the governance system described in this procedure is separate to the CAHS policy governance systems described in the [Child and Adolescent Health Service \(CAHS\) Policy Management Policy](#).

Procedure

Development and review

- A Model of Care may be reviewed and/or developed for one or more of the following reasons (but not limited to):
 - An existing Model of Care is due for review as part of the 3-year review cycle;
 - A new ICAMHS service is developed; and/or
 - A Model of Care amendment has been recommended (for example, Ministerials, via Clinical Incident Management System (CIMS), audit or ICA taskforce recommendations or change to service delivery).
- Approval must be sought from the document owner (Head of Department) to develop a new Model of Care or undertake early review of any Model of Care (early review is defined as more than 6 months prior to the planned review date).
- Models of Care are developed by an area of service with support from the ICAMHS Policy team and / or the ICAMHS Reform team.

- Where the Model of Care is for a **new** ICAMHS service, the ICAMHS Reform team will engage the ICAMHS Policy team and will oversee the development and facilitate stakeholder consultation. The draft document is handed over to the ICAMHS Policy team when the approval for the content in writing has been obtained from the document owner (Head of Department). The ICAMHS Policy team will facilitate the endorsement, publication and implementation.
- Where the Model of Care is for an **existing** ICAMHS Service, the ICAMHS Policy team will include and invite collaboration with the ICAMHS Reform team as part of the consultation process.
- Minor amendments to Models of Care do not generally require consultation and are approved by the document owner before publication on HealthPoint/SharePoint.

Structure and Content

- Models of Care must be drafted using the [Model of Care template](#).
 - The [Model of Care](#) template can be found on the CAMHS Policies, [Tools and Resources](#) HealthPoint page.
- The Models of Care document has headings that should be followed for each specific service where relevant.
- If further information is required, the author may include additional headings as required
- Entry protocols that were previously required and outlined on a separate Protocol document are now to be included in the Model of Care under the Admission access criteria.
- Models of Care must align with:
 - All relevant [Department of Health Policy Frameworks](#), the [CAHS Vision and Values](#) [CAHS Policy documents](#), and [ICAMHS Policies](#);
 - The [Mental Health Act 2014](#) and any other legislation relevant to the delivery of the service;
 - Office of the Chief Psychiatrist WA: [CP Guidelines](#)
 - The [Charter of Mental Health Care Principles](#); and
 - The [National Safety and Quality Health Service Standards](#) and [National Principles for Child Safe Organisations](#).

Consultation

- Development or review of Models of Care must include stakeholder consultation.
 - Stakeholders should be determined by the document owner in consultation with the ICAMHS Policy team and / or ICAMHS Reform team.

- All Models of Care in development or under review must be presented to the monthly State-wide Specialist Aboriginal Mental Health Services (SSAMHS) Huddle meeting for feedback.
- Some Models of Care will require further consultation with specialised groups or committees. For example, consumers via the Lived Experience Advisory Group (LEAG), ICAMHS Professional Leads, State-wide Specialist Aboriginal Mental Health Services (SSAMHS) or medical practitioners/leads via the Medical Advisory Committee (MAC) or ICAMHS Professional Leads, and the Policy and Procedure Working Group (PPWG).
- Feedback is collated, actioned and recorded via track changes / comments in the document or in a 'Feedback Register'.
- A completed [A10 - Aboriginal Health Impact Statement and Declaration](#) Form must be submitted with each reviewed policy document (as applicable) – advice can be sought from the State-wide Specialist Aboriginal Mental Health Services (SSAMHS)
- A completed [Health Equity Impact Statement and Declaration](#) Form to be submitted as per the [Health Equity Impact Statement and Declaration Policy](#) (as applicable)

Approval and Endorsement

- As per the [CAMHS Policy Management Work Instruction](#), the final draft of the Model of Care document and a summary of consultation and feedback must be approved in writing by the document owner (Head of Department).
- Following approval by the document owner, the Model of Care must be submitted to the ICAMHS Executive Committee – Clinical Governance (Safety and Quality, Audit, Risk and Compliance – SQARC) for endorsement.
- The endorsed Model of Care document will be published on the CAMHS Policy HealthPoint hub page under a dedicated section: [CAMHS Models of Care](#).

Implementation

- The endorsed Model of Care document will be published on the [CAMHS Policies](#) HealthPoint hub page under a dedicated section: [CAMHS Models of Care](#).
- The publication of Models of Care is promoted via
 - Email notification and policy update presentations to various ICAMHS leadership and management meetings, directorate committee meetings
 - The Headlines (as appropriate);
 - Monthly collaboration meetings between the ICAMHS Policy, Learning and Development, and Safety and Quality teams; and
 - Other relevant internal committees (e.g. Medical Advisory Committee (MAC), State-wide Specialist Aboriginal Mental Health Services (SSAMHS)).

Compliance Monitoring

- Document owners must consider the need for compliance monitoring (audit) of knowledge, access and adherence to the Model of Care based on a risk assessment.
- If compliance monitoring of the Model of Care is required, this should be stated within the Model of Care and must be registered with ICAMHS Safety, Quality and Performance. It may then may need to go through the quality improvement database (for assistance with GEKO, the CAHS Audit Coordinator can be contacted via CAHS.SQP@health.wa.gov.au).
- Compliance monitoring is led by Document Owners with input and feedback by the ICAMHS Quality and Governance and / or ICAMHS Policy team.

Governance

- The ICAMHS Policy team will maintain a register of all ICAMHS Models of Care including review dates.
- The status of all ICAMHS Models of Care is reported by the ICAMHS Policy team via the monthly policy report card tabled at the ICAMHS Executive Committee – Clinical Governance (Safety and Quality, Audit, Risk and Compliance – SQARC).

Roles and responsibilities

- The ICAMHS Director Clinical Services has overall responsibility for compliance with this procedure.
- Directors and Heads of Department (document owner(s)) are responsible for ensuring that any other formal agreements relating to services provided by ICAMHS (e.g. Memorandum of Understanding (MOU), Service Level Agreements (SLA's)) are considered in the development ICAMHS Models of Care.
- Service Managers and Heads of Service are responsible for ensuring that all staff within their service are aware of and can easily access the service's Model of Care.
- All ICAMHS staff are responsible for ensuring that they have read their service's Model of Care and use it to inform their practice.
