Guideline

Bedroom access wrist bands Cockburn Health

Reference #:FSFH-CH-GUI-0001

Scope

Site	Service/Department/Unit	Disciplines
Fiona Stanley Hospital	Cockburn Health	Medical, Nursing, Allied Health and Facilities management

1. Introduction

On admission to Cockburn Health (CH) each patient will be provided with a wrist band that allows them access to their bedroom, lift, courtyard and entry points. This guideline will outline the process for allocating and monitoring the use of the patient's bedroom wrist bands at CH.

2. Terminology

Wrist band	A silicone band with a magnetic chip used to access the patient's bedroom, lifts, courtyard and entrance points.
AGILITY	The Facilities Management online self-service system used to log work order requests for services or tasks required to support hospital activity.

3. Guideline

3.1. Key Principles

- The wrist band provided will only open the bedroom assigned to the patient.
- Wrist bands not currently in use will be stored in a locked cupboard located in the ward's treatment room.
- Each ward will maintain a written log for allocation and return of the patient wrist bands.

3.2. Safety

- Staff working at CH can use their staff identification badge to access all bedrooms to enable patient observation.

The information provided in this document is based on its relevance to Fiona Stanley Fremantle Hospital Group (FSFHG) only. Due to differences in context, scope of practice and differences in service delivery, FSFHG does not make claim to its relevance or appropriateness for use within other organisations/sites.

- During orientation to the ward and throughout their admission, staff will explain to the patient their bedroom is a private space and only the patient and staff are permitted to enter.
- A patient's ability to access their bedroom by their wrist band will be assessed as part of their risk assessment on admission and regularly reviewed throughout admission. The risk assessment will be documented on the Risk Assessment and Management Plan (RAMP).

3.3. Allocation of patient wrist bands

- When advised of a new patient admission, the receiving Nurse will assign a patient room and retrieve a wrist band from the treatment room.
- The receiving Nurse will document the wrist band allocation in the bedroom access log.
- On discharge from the ward the shift coordinator will ensure the wrist band is returned and:
 - complete the wrist band log as returned.
 - ensure the wrist band is cleaned using an approved disinfectant wipe.
 - store wristband in the treatment room.

3.4. Lost/Replacement wrist bands.

- Record lost or damaged wrist bands in the ward log for Facilities Management audit.
- Order replacement wrist bands on AGILITY:
 - Replacement wrist bands can be issued within 30 minutes Monday - Friday 07:00hrs to 15:00hrs.
 - After hours replacement wrist bands may take longer to obtain.

4. Compliance/performance monitoring

Regular weekly audits will be completed by the Night Shift Coordinator on each ward to ensure all patients have a wrist band to access their bedroom. The individual wards Nurse Unit Manager will monitor audit results.
